Bruce Farmer

Colchester, Connecticut
(860) 908-9593
bce.farmer@gmail.com

Skills:

Filemaker (Versions 15-18), Javascript, jQuery, HTML5, CSS, Node.js, SQL, REST API

Summary:

I have five years of development experience in the Filemaker platform. I'm also currently enrolled in the University of Connecticut's Web Development Boot-Camp. This is a part-time boot-camp that allows me to work.

Although my background is building CRM's for small businesses whose needs are not met by commercial applications, I am very open to Web Developer roles.

I have not only planned and executed applications for businesses; I have also created extensive, in-depth training materials for employees. No matter how well software is made, it may not be intuitive for everyone. That's why I believe technology onboarding should play a much greater role in the modern workplace.

Experience

Filemaker Developer

Self Employed - Colchester, CT February 2016 to Present

I performed contract work for small businesses. These duties included new database creation as well as overhauls for clients seeking to take advantage of newer features in the Filemaker platform.

Database Administrator/Developer (In House)

Klaus Larsen LLC - Hebron, CT July 2015 to September 2019

Created and maintained a large company's project management software. This software was a Filemaker-based custom application. I utilized good design principles to make easy-to-use interfaces, and trained employees face-to-face, remotely and remotely. For onboarding new employees in respect to technology, I created manuals and instructional videos. I also engaged in on-the-job troubleshooting with Sales Team, Production Department, and Call Center.

Set up Apple devices for new employees (iMacs, MacBook Airs, iPADs, iPhones). Train employees on company devices and acclimate them to Mac-specific software and operating systems (OSX and iOS).

Education

University of Connecticut: Web Developer Boot-Camp
Three Rivers Community College
